## CRITERIA FOR THE CPRE GLOUCESTERSHIRE AWARD

1. The following **general criteria** will apply to all categories.

- All projects considered for the Gloucestershire Award should involve *improvements to the rural environment*, whether natural or built.
- Projects should *demonstrate sustainability* in their construction, use and management.
- Projects should be *visible* from public places.

Innovation in achieving these criteria will be particularly welcome.

Projects will be assessed by a panel of judges.

2. Public, private, commercial and partnership projects are eligible.

There are three different categories of project, each with their own **specific criteria**:

**a) Buildings: new, restored or converted**

- new buildings must be appropriate to their setting
- restoration projects must respect the integrity of the original building
- building conversion projects must demonstrate sensitivity to historical practice in design and construction

**b) Natural environment**

The project must involve one or more of the following:

- enhanced biodiversity
- improved public access whilst safeguarding the natural environment
- improvement in the appearance of the locality
- increased learning opportunities

**c) Other community projects**

The project must involve:

- wide community involvement
- improvement to the provision of facilities for the community

re-confirmed June 2013
